Product Fact Sheet

SafeworkID™, part of the ConstructionID® Suite

SafeworkID™is one of three product solutions in the ConstructionID®
suite − Build&DefectID®, SafeworkID™ and IssuesID®.

safeworkID™

Introducing SafeworkID™

Knowing, managing and reporting all aspects of safety

SafeworkID™ is a comprehensive software package dedicated to knowing, managing and reporting all aspects of safety on a construction site. It assists companies and suppliers involved in construction projects to pro-actively manage safety risks, fulfil their duty of care to workers and achieve and maintain OH&S AS4801 certification.

The processes embedded in SafeworkID™ are designed specifically for the Australian construction industry. Processes, activities, language and reporting tools are tailored to the expectations, needs and standards of the Australian construction industry.

Customers subscribe to SafeworkID™ or purchase one or more product modules included within SafeworkID™.

Designed for

SafeworkID™has been developed in Australia to support the responsibilities of key professionals:

OH&S Managers and Directors, Safety Managers	CEOs, Managing Directors, Project Owners and Contractors	Construction Managers, Project Managers, Contract Managers, Site Managers

Delivers

✓ SafeworkID™ can be used on construction projects of all types and sizes, and can be accessed via mobile apps on site, on the move, and via desktop computers.

✓ Management reporting and dashboards mean that the exact status of OH&S practices are known and able to be managed everyday.

✓ Real-time visibility of safety processes of construction sites for project and safety directors, safety and site managers, and site personnel.

SafeworkID™ Features Overview

SafeworkID™ can be purchased off the shelf and is ready to go, or it can be tailored in two ways:

1. Include your logo on the screen – so that all the construction team know that safety is central to a successful delivery of the construction project.

2. Include any particular or unique OH&S processes and practices that are special to the project.

Feature	Benefit
1. Standardised Safety Processes	
Library of OH&S Forms and Templates: • Inductions – Personnel • Inductions – Plant, Equipment and Assets • Site Diary* • Safety Walks* • Safety Meetings – Agenda and Minutes • Zone Management • Injury and Incident Reporting* • Emergency and Evacuation Management • OH&S Audit* • Permits Audit	A set of standardised safety processes that are ready to use and save time and costs. They ensure: ✓ There is a known and consistent approach to safety processes. ✓ The safety processes are able to be measured and reported on. ✓ The processes use Australian language and are designed to reflect Australian practices. ✓ Particular or special safety processes that are unique to the construction project can be added. ✓ Comprehensive library of templates ensures that the software is ready to support OH&S processes. ✓ Forms include: Hazardous Materials and Environmental Management Checklist, Toolbox Talk template, Task Observation Form, Drop Zone and Delivery Forms. There is also a Formbuilder wizard that allows you to create your own forms.
2. Management Reporting	
Executive Reporting	✓ A set of management reports that ensure the status and activities related to managing a safe worksite are known by OH&S leaders and management. ✓ Site level dashboard ensures that OH&S activities and Safety KPIs are reported on daily.
3. Communications	
Construction Personnel Database	✓ Easily communicate with all personnel on site via a database of names, contact details and emergency contact details. ✓ Transparency of all safety issues for site personnel.

* Product modules included in SafeworkID™ which can be purchased individually ([see page 4](#))

Feature	Benefit
4. Sources of Truth for important information	
	✓ One place easily accessible to construction personnel for all the important information related to safety.
	✓ Eliminate duplicate, paper-based and costly information management practices by using centralised sources of truth.
Personnel Registration and Profiles	✓ Easily manage and report from a centralised database containing site personnel details and their certifications is included
Safe Work Method Statements (SWMS)	✓ Easy access to SWMS for managing and audit purposes via a central repository for all SWMS.
Injury and Incident Register	✓ Know, report and have easy access to all reported injuries and incidents via a centralised repository.
5. Tailored to the Australian marketplace	
	✓ Ready made processes, activities, data capture, language and reporting tools are tailored to the expectations, needs and standards of the Australian construction industry.
6. Ready to use, easy to use	
Can be purchased off the shelf and is ready to use instantly.	✓ A full database of standard safety processes and forms are included. It is ready to be used now.
7. Can be tailored	
Tailoring of screen and some content (if required).	✓ The company logo can be placed at the top of the screen, communicating that the safety processes captured via the software are endorsed by leadership and are part of the project.
	✓ Specific or unique building processes can be added into SafeworkID™.
8. Mobile and tablet ready, Cloud-based	
	✓ Can be used on mobile, tablet or desktop and is Cloud-based and secure.
9. Ongoing Australian software support and training	
Australian-based software support services and training.	✓ Premium customer service located in Melbourne, ready to ensure any questions from customers are resolved.
	✓ Training provided on site, in the office or online.

About ConstructionID®

ConstructionID® is a comprehensive suite of software that supports the successful delivery of the build, post-construction and maintenance phases of a construction project. It is tailored to the Australian construction industry and has been servicing construction projects for a decade. ConstructionID® is developed and owned by Wiseworking Pty Ltd.

The software suite, and its parts have been designed to:

✓ Pro-actively identify and manage risks and opportunities.

✓ Create a culture that supports standardised processes and reporting.

✓ Reflect Australian processes, activities, data capture, language and reporting tools used in the Australian construction and building industries.

✓ Directly support achieving and maintaining OH&S certification AS4801 and quality certification AS9001.

✓ Real-time visibility of the quality, safety and maintenance of construction projects.

ConstructionID® has been designed in Australia to support the responsibilities of key professionals:

- CEOs, Managing Directors, Project Owners and Contractors
- Construction, Project, Contract, Site Directors and Managers
- Contractors
- OH&S Directors and Managers
- Quality Directors and Managers
- Asset and Maintenance Managers

ConstructionID® grows with your construction business and projects. Clients subscribe to all or some of the **three product solutions** – Build&DefectID®, SafeworkID™ and/or IssuesID®. It is also possible to subscribe to one or more **product modules** included within Build&DefectID® and SafeworkID™.

build&defectID®

Delivering projects on time and to quality

Build&DefectID® is a comprehensive software package that supports the delivery of construction projects on time and to quality. It is tailored to the construction, post-construction and maintenance (Defect Liability Period) phases. It supports achieving and maintaining quality certification AS9001.

safeworkID™

Knowing, managing and reporting all aspects of safety

SafeworkID™ is a comprehensive software package dedicated to managing and reporting all aspects of safety on a construction site. It assists construction companies and suppliers involved in the build phase of a project to:

- know and pro-actively manage safety risks;
- fulfil their duty of care to workers; and
- achieve and maintain OH&S certification AS4801.

issuesID®

Managing building and maintenance issues

IssuesID® is a comprehensive software package for managing processes, activities, reporting and the fixing of building defects and maintenance issues. It is tailored to the Post-Construction and Maintenance phases of a construction project. And it is used to support maintenance of existing buildings. IssuesID® is software designed specifically for the Australian construction and building management industries.
